

BALTIMORE INNOVATION CIRCLE 2019-2020

Are you passionate about leveraging digital technology to improve teaching and learning? Sefaria's interfaces and tools provide new opportunities for engaging in classical texts and the chance to develop new forms of pedagogy. Our team is committed to supporting educators who are willing to innovate as we think about how education is shifting in the age of digital technology. Join us as we continue to explore how to re-envision teaching in conjunction with the new medium we have for exploring our texts.

Participants in this program will collaborate with Sefaria's education department and the other members of their cohort and use Sefaria's digital technology to develop materials and methodology grounded in a [constructivist](#) approach to

learning. Each educator will frame their own question or challenge and will leverage Sefaria's resources and the resources of the entire cohort to iterate and experiment with responses to that question.

Participants will:

- Have the full resources of Sefaria's education department to support their work through collaboration, brainstorming, and iterating
- Be trained and credentialed in using Sefaria in the classroom
- Be eligible to have their materials featured in the educators' space on our web site, distinguished by the Sefaria Seal of Pedagogic Excellence

This year's Innovation Circle is open only to educators in the greater Baltimore area. Click [here](#) to apply for this opportunity.
